Test Management

To do: Make a submission

To do: Receive a grade

Due: Tuesday, 19 November 2024, 10:00 AM

In this assignment, you will engage in the analysis of the testing process and release quality of a project's upcoming release.

Detailed instructions are provided in the PDF file below. Read the PDF file carefully, and answer the questions

Submission: Submit the completed assignment as a PDF file through the submission field. Set the file name as `Test_management_studentnumber.pdf` replacing `studentnumber` with your actual student number.

Grading: This assignment is graded out of 4 points.

- Question 1:**
 - 1.5p: The answer thoroughly analyses the information in the figure and gives a sensible interpretation. The answer contains a well-motivated recommendation regarding further testing.
 - 1-0.5p: The answer is incomplete with respect to the information analysed or the recommendation regarding further testing, does not provide adequate motivation, or is not entirely accurate compared to the information given.
 - 0p: The answer is very incomplete, lacks proper motivation, or has severe inaccuracies compared to the information given.
- Question 2:**
 - 1p: The similarities and differences mentioned are correct and well explained using the information given.
 - 0.75-0.25p: Some similarities and differences are accurate, but the explanation lacks completeness or may not entirely derive from the information given.
 - 0p: The similarities and differences are incorrect or not explained through the information given.
- Question 3:**
 - 1.5p: The answer gives a clear yes or no recommendation, has a comprehensive and well-motivated explanation, thorough discussion of risks, contains a solid mitigation plan, and effective linkage to both previous and current iteration data.
 - 1-0.5p: The answer gives a clear recommendation, generally well-motivated explanation, but may lack depth in certain areas. Risks and mitigation are discussed, but some aspects could be more detailed. There is adequate linkage to available data.
 - 0p: The response lacks a clear yes or no recommendation, has an insufficient explanation, or fails to address risks, mitigation, and data linkage.

Use of AI and Collaboration with Other Students: Using AI tools to produce an answer for this assignment is not permitted. All parts of the submission must be produced by yourself (apart from files provided in the assignment). Collaboration with other students is not permitted. This is an individual assignment that you must author independently.
